

# TekExpress 400G Transmitter Test

## Electrical Conformance and Characterization Solution for Real-Time Oscilloscopes

The new Tektronix real-time instrument based OIF-CEI-56G-VSR/MR/LR, OIF-CEI-112G-VSR, IEEE: 802.3bs (200GAUI-4 and 400GAUI-8), 802.3cd (CR4, KR4), 802.3ck™ (100GAUI-1, 200GAUI-2, and 400GAUI-4), and 802.3ck™ (100GCR-1, 200GCR-2, and 400GCR-4) Transmitter Characterization automation system provides turnkey testing and debugging of the industry's most common 400G PAMJET electrical interfaces. The silicon designers need to perform the 400G based electrical validation of their silicon; the system designers need to perform the 400G based electrical validation.

### Key Features

- Offers streamlined and fully automated transmitter characterization of OIF-CEI-56G-VSR/MR/LR, OIF-CEI-112G-VSR, and IEEE: 802.3bs (200GAUI-4 and 400GAUI-8), 802.3cd (CR4, KR4), 802.3ck™ (100GAUI-1, 200GAUI-2, and 400GAUI-4), and 802.3ck™ (100GCR-1, 200GCR-2, and 400GCR-4) electrical transmitter specifications.
- Extends PAMJET software package (PAMJET software package) for in-depth analysis and debug of fully automated conformance test solution.

### Applications

- Validation of OIF-CEI-56G-VSR/MR/LR, OIF-CEI-112G-VSR, and IEEE-802.3bs/cd standards
- Measurements of electrical transmitter :
  - 802.3ck™ Electrical 100 Gb/s Signaling for 100GAUI-1, 200GAUI-2, and 400GAUI-4.

- 802.3ck™ (100GCR-1, 200GCR-2, and 400GCR-4)

### OIF-CEI-56G-VSR/MR/LR, OIF-CEI-112G-VSR, IEEE-802.3bs/cd, IEEE-802.3ck AUI and CR fully automated electrical transmitter real-time oscilloscope measurements

This application package is designed for a 50 GHz or higher, 70K SX instrument pair. For 802.3ck the performance level is >= 59 GHz or higher, a 70K SX instrument pair is required. The software loads the required roll-off filters with appropriate bandwidth. The low noise level of the ATI architecture serves the key signal-to-noise and distortion ratio measurements, which are attained with margin on the 70K SX systems. The solution is also available on non-70K SX systems, such as 33 GHz, higher 70K DX, and MSO instruments with an understanding that these are for debug only and not for the specification level conformance validation.

## Reports and measurements results

The screenshot shows the 'Reports' tab of the TekExpress 400G-TXE software. It includes options for 'Report Update Mode' (Generate new report, Append with previous run session, Replace current test results), 'Report Creation Settings' (Report name: X:\400G-TXE\Reports\DU001.mht, Save as type: Web Archive (\*.mht, \*.mhml)), and 'Contents To Save' (Auto increment report name if duplicate, Create report automatically at the end of the run, checkboxes for pass/fail info, detailed results, plot images, setup configuration, margin value in percentage, and user comments). Buttons for 'View', 'Generate Report', and 'Save As' are at the bottom.

## Ordering information

Compliance testing to IEEE 802.3bs, 802.3cd, and 802.3ck Standards or OIF Standards for 400G at PAMJET, 26+ Gb/s /50Gb/s, and 53+ Gb/s /100Gb/s per lane requires a minimum of 2-stack SX oscilloscopes with Bandwidth  $\geq$ 50 GHz (50Gb/s per lane) and 59 GHz (100Gb/s per lane). When Tektronix oscilloscopes with lower bandwidth support the option, they might be used for troubleshooting.

## Models

Software description	Supported oscilloscopes	Ordering option

## Prerequisites

The following oscilloscope software is required:

Software details	Ordering option
PAMJET <sup>3</sup> Transmitter Analysis Software for electrical signals	PAMJET-E
PAMJET <sup>3</sup> Measurement Analysis Software for 802.3ck (required for 802.3ck only)	PAM400GCK
DPOJET Jitter and Eye Analysis Tools - Advanced	DJA
DPOJET Jitter and Eye Analysis Tools - Noise (Optional)	DJAN
Serial Data Link Analysis toolkit (Optional)	SDLA64

## Tektronix Asset Management System (AMS)

Optional software requires the purchase of a license before they are functional. Some software may require additional software licenses. Licenses are managed within the Tektronix Asset Management System (Tek AMS). The Tek AMS website address is [www.tek.com/en/support/products/product-license](http://www.tek.com/en/support/products/product-license). Product license management requires a login account.

- Node Locked Licenses provide your own copy of the application on your instrument or personal computer and are permanently assigned to a specific Host ID or product model/serial number.
- Floating licenses can be moved between different Host IDs or product models.

Use the Tektronix Asset Management system to check in and check out floating licenses.

Tektronix is registered to ISO 9001 and ISO 14001 by SRI Quality System Registrar.

Product(s) complies with IEEE Standard 488.1-1987, RS-232-C, and with Tektronix Standard Codes and Formats.

<sup>3</sup> The PAMJET software package was formerly known as (fka) "PAM4".
