

# LinkRunner G2 Smart Network Tester

The Smart Network Tester for the connected world

The LinkRunner™ G2 smart network tester streamlines workflows by combining the essential aspects of installation and triage in a single, ruggedized unit.

As the world's leading network connectivity tester, LinkRunner provides immediate visibility and value to network professionals responsible for delivering network services. By combining Ethernet test capabilities for copper and fiber links with the Android™ OS<sup>1</sup>, LinkRunner G2 represents a breakthrough in handheld network test that elevates the proficiency and productivity of network technicians responsible for troubleshooting as well as deployment and validation of network connected devices.

## LinkRunner G2 Key Features:

- Verify connectivity at 10/100/1000 over copper or 10/1000 over fiber
- Android-based OS
- Wi-Fi and Bluetooth capable with optional Edimax<sup>2</sup> adapter
- TruePower™ PoE/UPOE load testing across all 4 pairs
- Cable validation including distance to fault
- Discover the nearest switch/slot/port and VLAN/Voice VLAN
- DHCP, DNS and Gateway connectivity test
- Ping and TCP port connectivity test
- Automated test result upload to Link-Live Cloud Service
- Packet reflection up to 1 Gbps
