## The compact commercial DMM with AutoTect™ and VolTect™

- AutoTect™ feature directs the meter to know if it is measuring ac volts, dc volts or resistance with no user interface required
- The AutoTect™ feature has lower input impedance which zeros out ghost voltages
- Measures capacitance, frequency, continuity with beeper plus includes VolTect™ a built-in, non-contact voltage detector
- Complete user protection with full safety ratings of CAT III 300 V, CAT II 450 V and UL and CSA listing
- Large oversize digital display
- Protective silicon holster included, attached test leads, battery and manual
- One-year, no-hassle warranty

This meter is the essential shirt-pocket size meter. Only 3/8" thick and less than 3 oz in weight, this meter offers full functionality with ac and dc voltage to 450 V, resistance to 6 Megohm, capacitance to 100 µF, frequency to 30 kHz and continuity w/beeper. It also offers VolTect™ a built-in, non-contact voltage detector for ac voltages.

Another key feature is AutoTect™, which automatically selects ac voltage, dc voltage or resistance measurement based on the test

point to which the leads are connected. Fully autoranging, this meter offers seven different measurement functions plus features that are usually found in much more expensive and larger meters. The digital display is oversized with large digits and unit icons in the display. In spite of its size, this meter is fully safety rated to CAT III 300 V, CAT II 450 V and is UL listed. Includes a silicone protective holster, attached test leads, battery and manual.
